[ILU1, ILU2 & ILU3 SDKs for Windows (1st Generation) support for GDAC](The .NET runtime on Windows is one of the most popular environments for .NET developers. The recent introduction of .NET Core 2.0 and Xamarin.Forms opened up the possibility of creating applications with a more familiar .NET framework. However, .NET Core 2.0 and Xamarin.Forms still require .NET Framework 4.6 or later which is not the case with the ILU1, ILU2 and ILU3 SDKs for Windows 1st Generation.

With the release of .NET Core 2.0, Microsoft introduced a cross-platform runtime which is very lightweight and which is optimized for the cloud. However, it still cannot be installed on Windows PCs. The ILU1, ILU2 and ILU3 SDKs for Windows 1st Generation provides the solution to create native Windows applications with a more familiar .NET framework. The SDKs allow developers to easily create Windows 10 or Universal Windows Platform (UWP) applications which can be installed and run on Windows 10 PCs. **What are the differences with ILU2 & ILU3?*

The ILU2 and ILU3 SDKs for Windows 1st Generation are supported by the .NET Framework 4.6. The ILU1 SDKs are supported by .NET Framework 4.5. The .NET Standard Library supports .NET Framework 4.6. In this case, the ILU1 SDKs for Windows 1st Generation can be used to create

applications targeting the .NET Standard Library and supporting .NET Framework 4.6 or later. The ILU1 SDKs for Windows 1st Generation cannot be used to target .NET Framework 4.5 and earlier. However, the SDKs support all the features of .NET Framework 4.5 (such as 82157476af
